Increasing Taxes

Concord, N. H., February 8, 1915.

To the Selectmen:

We suggest that you cause the following extract from the report of the Tax Commission for 1914 to be printed in your town report this spring. It may tend to economy in town appropriations.

Very truly,

STATE TAX COMMISSION,

By W. B. Fellows, Secretary.

REPORT STATE TAX COMMISSION 1914.

Increase in Public Expenditures.

No power has constituted the members of the tax commission guardians of the public in respect to expenditures for the support of government, and they have no disposition to assume that role. Nevertheless, "economy being a most essential virtue in all states," and it being "the duty of legislators and magistrates * * * to countenance and inculcate the principles of * * * economy," all as set forth in the constitution of this state, the commissioners believe themselves to be amply justified in urging, as they have so often urged before, the importance of this subject upon the voters of the state. The public revenue, state and municipal, is the voters' business and they are responsible, directly or indirectly, for every extravagance affecting it from the inception to the termination of the fund.

Every compulsory contribution levied by public authority upon people or property is in the broad sense of the term a tax, nor is it made less obnoxious or burdensome if called a fee or a fine. In the figures that follow, therefore, all fees, fines, and other exactions, if any, are included with the taxes upon polls and estates. To illustrate the comparative importance of the two classes, it may be said that the taxes upon polls and estates represent about 95 per cent. and all other income about 5 per cent. of the total revenue of the state, and of the counties, cities, towns, districts and precincts therein.

Taxes as defined above have increased by leaps and bounds in recent years. In 1903 the sum of all the taxes assessed by and within the state of New Hampshire was $5,373,420.22; in 1913 it was $8,765,039.07, an increase of $3,391,618.85, or 63 per cent., in ten years. But these figures do not adequately represent the velocity the upward movement has now attained. To show that it is necessary to divide the ten-year period: The levy in 1908 was $924,388.79, or 17 per cent. greater than in 1903, while that in 1913 was

$2,467,230.06, or 39 per cent. greater than in 1908. By so much did the advance in the last half of said period exceed that in the first half. These figures will be the more alarming if it is remembered that while taxes already sufficiently heavy were advancing 63 per cent., the population of the state increased only about 4½ per cent., and while the one was advancing 39 per cent., the other increased only about 2¼ per cent.

It is instructive to study the subject from another angle. In the ten years from 1904 to 1914, both inclusive, the annual increase in all taxes defined and limited as above was as follows:

1904	$ 34,459.91	1909	$539,995.97
1905	286,590.14	1910	787,565.31
1906	115,468.39	1911	215,848.50
1907	411,257.46	1912	296,216.85
1908	76,612.89	1913	627,603.43

The average yearly increase for the whole period was $336,561.85. The upward trend is more plainly shown, however, by dividing, as before, the ten-year period in the middle and considering the halves separately. For the first five years the average annual increase was $184,877.76; for the last five years it was $493,446.01. It is surely pertinent to consider how long the little state of New Hampshire, almost stationary in wealth, can sustain a tax already burdensome and increasing at the rate of practically half a million dollars a year without crippling her industries and impoverishing her people. Plainly it is a condition not calculated to attract capital from without the state or to encourage business within the same.

From the per capita standpoint the situation is not less disturbing. In 1903 there were assessed $12.88 in taxes for each man, woman and child in the state. Five years later there were assessed $14.75 for each individual, and in five years more $20.09. If in 1913 taxes had been equally distributed among all the people it would have meant a burden of $100 for each family of five members. Though in reality there was little such equality in the assessment there was much in the payment. The fact is that those who occupy, use or consume property, no matter who owns it, are those who in the last analysis pay most, if not all, of the taxes thereon. If the wage earner or the man of limited means understood he was in reality paying something like $100 a year in state and municipal and half as much more in federal taxes for the government of himself, his wife and three children, his influence and his vote would more frequently make for economy in appropriations and expenditures than heretofore.

No statistics for the year 1914 appear in the above paragraphs for the reason that they are not yet at hand except in part.

During the past year we have published the full Proceedings of the Dedication of the Library Building, which was presented to the town by Daniel E. Bradley of Berlin, Conn.

The pamphlet contains a description of the building, its furniture and tablet, and the names of the trustees, with an appendix containing the communications of the donor, proffering the donation of the building and grounds, the former homestead of the late Daniel Spaulding, and the resolution of the town in acceptance, adopted by the town at the annual town meeting March 12, 1912, with a list of subscriptions and disbursements made and applied toward the repairs and fitting the building for the uses and purposes as a home for uur valuable town library.

On the frontispiece of the pamphlet will be found an excellent picture of the front view of the building. The printing and binding of the pamphlet was very neatly and acceptably done by the Rumford Press of Concord, N. H.

Extra copies of the pamphlet can be obtained of the librarian at the library at ten cents per copy.

Report of the Board of Health

For 1914-1915.

During the past year the local board of health have kept in touch with the state board, have investigated and caused to be abated several nuisances that were a danger to the public health and are preparing regulations under the advice of the state officers to protect the waters of South Pond, generally known in this vicinity as Laurel Lake, from contamination. Whenever practical they have urged the use of an air-tight septic tank in place of the cesspool, as they take care of the drainage when properly built.

There have been two cases of diphtheria and two cases of scarlet fever during the past year, but in no case did the disease spread beyond the homes where it originally started. The cases all recovered.

Report of

Superintendent of Schools

To the School Board of Fitzwilliam:—

I herewith submit my third annual report, the fifteenth annual report of the Superintendent of Schools.

ENROLLMENT

The following table is to show the membership by schools and by grades and to afford a comparison with a similar table for the school year 1913-14:

SCHOOLS	Grade I	Grdue II	Grade III	Grade IV	Grade V	Grade VI	Grade VII	Grade VIII	High School	Totals	Increase or Decrease
High School									20	20	+20
Eighth Grade								4		4	+ 4
Number 1	4	1		2	5	2		1		15	— 2
Number 5 Primary	10	8	11	8						37	— 3
Number 5 Gram.					10	7	4			21	—10
Columbian Primary	12	10	8	12						42	+ 9
Columbian Gram.					12	15	8			35	+ 5
Numder 10	6	1	3		4	4				18	— 3
	32	20	22	22	31	28	12	5	20	192	+20

This table shows an increase of twenty scholars in the Fitzwilliam schools, which increase is exactly the present enrollment in the freshman and sophomore classes of the high school. While the registration at present in the Village is a

little lower than that of last year at the corresponding time, yet this loss is more than offset by the growth in membership at the Columbian school. No schoolroom in town is at present overcrowded and, I am glad to report, no schoolroom has suffered thus far this year from lack of heat. In this connection I will report that the heating arrangement in the recently occupied rooms in the town hall has been a conspicuous success, doing the work in a highly satisfactory manner at a very moderate cost.

HIGH SCHOOL

The most notable event in the educational life of the town has been the establishment of Fitzwilliam High School in September of this year; and as may be reasonably expected, I shall devote most of this report to your board to a consideration of that topic, with particular emphasis on its history, program of study, teaching force, daily time-table, extension to a full four years' course, and its finances.

HISTORY

In order to give some idea to the townspeople now and to future generations of the beginning of the High School, I shall include verbatim an introduction to the records written by its first principal, Mr. H. Gardner Chase.

Previous to September, 1914, Fitzwilliam had no High School. At the March meeting of the spring before, the question was brought up, $1500 appropriated, and the School Board, Mrs. Lolie R. Pierce, Dr. George S. Emerson and Mr. Francis R. Parker, were instructed to use these funds to start a new High School.

On Sept. 8, 1914, the High School was opened in the building which had been previously used for the grades. The whole building was given over to the High School, the lower room having been divided so as to make two rooms, one for the Domestic Science department and the other for the Agricultural department, while the second floor was given twenty-six new desks and was used as a general study and recitation room.

Two years' work was offered in the college preparatory course, one year's work offered in the agricultural course and one in the domestic science course. The plan was to extend these courses to cover a full course of three years in all three departments, although at present the state approval extends over the two years' program. Hence the High School is now of the third class.

The school opened with H. Gardner Chase, of Richford, Vt., as principal, and Mary B. Oliver, of Lisbon, N. H., as assistant. The former is a graduate of the University of Vermont, the latter a graduate of Wellesley, with special work at Simmons College.

The enrollment to begin with was twenty-three, two of whom have since left town. Four of the pupils are sophomores; nineteen are in the first year courses. In addition to these there is an eighth grade of five pupils under charge of Miss Oliver.

PROGRAM OF STUDY

College Preparatory Course

Freshman—Latin, Algebra, English, Ancient History.

Sophomore—Latin, Geometry, English, French.

*Junior—Latin, Chemistry, English, French.

Agricultural Course

Freshman—English, Agronomy, Manual Training, Algebra.

Domestic Arts

Freshman—English, French, Ancient History, Cooking and Sewing.

Sophomore — English, French, Household Appliances, Household Sanitation, Geometry.

Junior—(No class 1915-16).

---

*Proposed addition for the year 1915-16.

PRESENT REGISTRATION BY CLASSES

In connection with the present program and its extension to the junior year, I submit to you the present registration in the different classes and the time spent each week on the several subjects:

Subject.	No. in Class.	Time per Week.
Opening exercises		40 minutes
Latin I	7	3 hours, 20 minutes
Manual Training	4	$4\frac{3}{4}$ hours.
Agronomy	4	$4\frac{3}{4}$ hours.
Algebra	9	3 hours, 20 minutes
Geometry	3	3 hours, 20 minutes
Domestic Science	8	6 hours, 40 minutes
Geography	4	1 hour, 40 minutes
History	4	1 hour, 40 minutes
Physiology	4	2 hours, 45 minutes
Grammar	4	
Arithmetic	4	2 hours, 45 minutes
Latin II	2	2 hours, 45 minutes
English I	16	2 hours, 45 minutes
English II	4	2 hours, 45 minutes
French I	9	2 hours, 45 minutes
Ancient History	10	2 hours, 45 minutes

In order to extend the present course it will be highly desirable to eliminate the eighth grade from the High School, so that all the time of the High School teachers may be applied to the teaching of additional subjects called for in the third year of High School work, and I recommend such a change, beginning next September.

I have never felt any doubt as to the success of the High School after good teachers were secured. Several things pointed toward this, the genuine interest of the scholars, their application to the work, and above all the remarkable record of attendance for a smaller High School, 98.5 per cent. Permit me in this connection to quote from a letter dated Feb.

13, 1915, from Mr. George H. Whitcher, State Inspector of High Schools:

"I want to tell you that I am mightily pleased with the kind of work that that school is doing. It looks to me as though the Fitzwilliam High School in the first year of its existence under your supervision and the efforts of teachers and School Board has been a pronounced success. I hope it suffers no setback from lack of support or from any other cause."

REPAIRS

The Columbian School is much in need of small but not expensive repairing. I list a few of the repairs needed.

Ceilings whitened.

Plastering in halls patched and whole retinted.

Window-panes reputtied.

Panels in doors fixed.

Locks and doorknobs in outside doors.

The Keene National Bank informs me that the Fitzwilliam school savings account has a credit of $157.25.

I would like to mention the excellent attitude of the teaching force in closing, as well as express my thanks to all those who have aided by word or deed in the advancement of the Fitzwilliam schools.

Respectfully submitted,

WILLIAM L. MacDONALD,
Superintendent of Schools.

East Jaffrey, N. H., February 1, 1915.
